Please enjoy these pictures from our farm – they tell our story better than words can!

One of YSF’s favorite crops is organic garlic – which we harvest three times: Green garlic in early Spring, Garlic scapes in late Spring and traditional garlic in late Summer.

Sunflowers are a favorite PYO flower for members – we grow many varieties throughout the Summer.

Dozens of ripe organic tomatoes for CSA members to peruse and select from. We grow many types of tomatoes for at least 8-10 weeks so everyone gets their fill.

A CSA member took this picture which we call the “beautiful” CSA share picture. All vegetables from a YSF CSA share in September!

Members make bouquets of colorful zinnias and asters – a real treat!
